RE: My response to your letter of 22nd June 2022

Dear Mr. Micklewright,

1. In response to your letter addressing my letters of 25th May and May 26th:
2. Firstly you state that the Office hasn't participated in any crime against me. Therefore, as the Official Spokesman of the Office and being the Deputy Director perhaps you can read the following points 3 -5 and answer my question made in point 6 with your proper legal defence:
3. In 2011/12 I was made aware of a possible fraud of my patent GB2390104. I pursued the suspects Britannia Fasteners and Betafence (as well as FH Brundle) for answers and as to why they were using my name to order goods from foreign manufacturers that I allege are defrauded from my patent. They issued malicious proceedings against me in a claim for 'unjustified threats' in an attempt to prevent me from enforcing my IP rights against them. During proceedings and in 2013 I requested an Official Opinion from your Office as to whether or not the Office thought the alleged defrauded Betafence product infringed my patent.

In that Opinion request I informed your Office and made your Office aware that these firms had been illegally and fraudulently using my name to order the suspect goods from foreign manufacturers who alerted me to the fraud and had also been conspiring to find ways around the Patents Act before the Act was later amended. I also informed your Office that in the responses to the Opinion submitted by the suspects Britannia Fasteners and Betafence they submitted falsified CAD drawing sheets which were design drawings of the suspect product. These drawings had drawing dates printed of June 2003 and then another drawing with a date of June 2003 and on that same drawing a copyright date of

2005. They had then deliberately omitted or erased the 2005 copyright date from the first drawing. I allege it was just a freshly printed drawing deliberately omitting the 2005 copyright date.

Evidence found in other patent applications of Betafence and Bekhert Fencing prove that the drawings could not possibly have been drawn in 2003 and they certainly did not manufacture or sell the defrauded product in 2003. Hence the 2005 copyright date which is the true date the drawings were drawn and after I had already had my patent GB2390104 granted in 2004 with a filing date of August 2003.

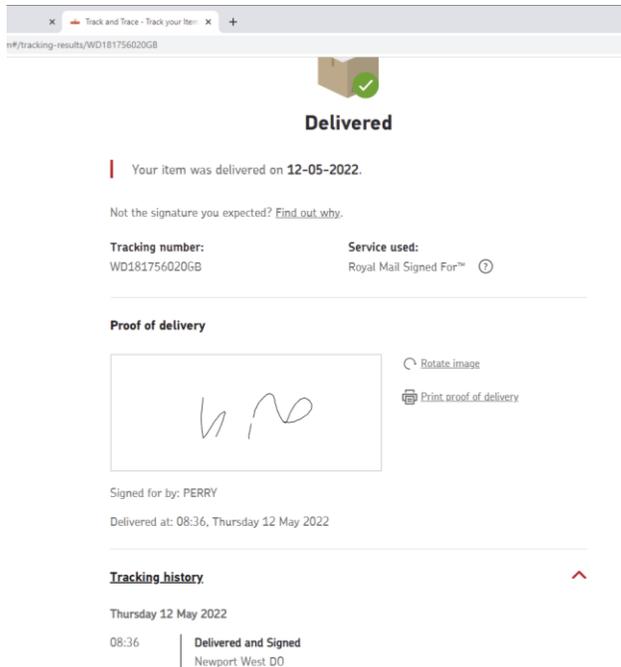

The suspects falsified the drawing date to try to make it look as if they thought of the same idea for my fence bracket (which is clearly and obviously defrauded from my patent) only 2 months before I did. They refuse to provide any evidence whatsoever that they originally drew the drawings in 2003 and had not applied for any patent on the product in 2003 when they have patents on everything else they manufacture. They later tried to file a patent on the very same product outlined in my patent (and shown in their drawing) in October 2005 after I had already patented the fence bracket idea in 2004. Your Office refuses to disclose the content of that application known as GB0422708.8. In 2015 and after I had been made bankrupt by their criminally obtained bankruptcy order they even tried to buy my patent GB2390104 from Begbies Traynor Group who had become a trustee and who were also conspiring with the Bristol Official Receiver and your Office to do whatever you all could to permanently deprive me of my lifetime's work consisting of 22 granted patents, 100+ worldwide other applications, industrial designs, trademarks and market leading products. Proof is found in emails that have passed between your Office, the Bristol Official Receiver and the others involved.

The civil cases lasted 6 years and I faced a barrage of judicial crime and fraudulent judgements, Government Departments conspiring and acting criminally to deprive me of my IP rights and Police Force treason and corruption with the Police Force telling me *'we don't know what crime is'*. This led to my bankruptcy and the loss of my thriving business and all of my lifetime's work. It has almost led to my death through the sheer terror of fighting severe corruption and organised crime and ten years of mental torture and persecution.

After the suspects had made me bankrupt in their malicious and fraudulent claim against me, they even tried to buy my patent GB2390104 for GBP5000 from Begbies Traynor Group and the Bristol Official Receiver when they had testified, (and the whole basis of their claim against me was), that they didn't have any interest in me or my patents. On top of which they had already made in excess of 10 million pounds in the UK alone from my patent that I allege they defrauded. It is also now proven that your Office conspired with the Bristol Official Receiver to continue to defraud me and allow the crime to continue even as of today, you're

still refusing to come clean and own up to it and still act criminally in a desperate attempt to conceal your GBP25bn fraud against me.

4. It turned out at the hearing on 6th June 2022 that your Office didn't take any legal advice as to whether or not the IP rights could even be forfeited because there is a contract between myself and the Office for those rights and your Office had not received any money from the Bristol Official Receiver to progress or safeguard and maintain my patents. Your Office conspired with the others to do as much damage as you could to my investment and staggering achievement which has been dirtied and destroyed by your crime. Your Office failed and refused to send me any correspondence whatsoever in relation to any of my IP rights after you thought that I had been made bankrupt and had gone away. You thought you had gotten away with it. In 2022 and after I have exposed your criminal trading of patents with worldwide firms and people of privilege in a black-market style set up, your Office, in retaliation, immediately blocked access to the online filing system so that I couldn't file my work, which is a criminal offence of Malicious Intent.
5. In response to that and recent events and in yet more deceitful statements your Office is making even this week, your Office tries to make it look as if I don't have any idea of how to use the online filing system after having used it for over 10 years and even up until January this year immediately before your Office blocked the access to it. You also refuse to send a filing receipt for the same patent application I tried filing online which was sent by post to your Office and signed for on 12th May by your Office with someone using the name 'Perry'. I also demanded that your Office tell me if it employs anyone having the name 'Perry' after the fraudulent use of my surname by criminals that your Office is in bed with. The Patent Office is being used as a money laundering system for crime families and worldwide firms stealing and defrauding IP rights, unbeknown to the innocent applicant. The Royal Mail delivery number for the filed paper application is: WD181756020GB. Proof of sending and of delivery below:

6. My Question mentioned in my opening:

Therefore as the Deputy Director of the Office's legal arm I want you to explain in detail, and show proof with any supporting evidence, what your Office did and what action your Office took in 2013 (long before the outcome of any civil court cases) to protect me and safeguard my work and investments after I had informed your Office on at least two separate occasions of the fraudulent use of my name on the purchase orders of Britannia Fasteners and of the falsified CAD drawings belonging to Betafence that they submitted to your Office?

7. During the hearing of 6th June 22 at your Office Mrs Taylor accepted and/or remained silent and refused to admit that your Office did absolutely nothing and instead continued to aid and abet Britannia Fasteners and Betafence. According to her your Office didn't even take any legal advice or even file a Police report. You thought you would just ignore it and hope that it went away. Hence you now refuse to release the transcripts of the recorded hearing but luckily I recorded at least half of it on my phone as evidence. Please answer my question posed in Point 6. Fobbing me off to the Ombudsman so that your Office can evade liability shows your Office's guilt.

8. I intend to sue your Office with criminal charges for conspiracy to defraud and as an accessory to a criminal conspiracy and also for evasion of liability by deception. There are also over 20 other criminal offences such as Perjury, Tendering of False Statements, Witness Intimidation, Concealment, Falsifying Evidence, Corroboration, Aiding and Abetting, etc... which is proven in dozens of fraudulent letters that your Office has been sending since 2012. Your Office has

been doing this to try to evade liability for my loss of my lifetime's work which seems to be valued at \$40bn (GBP25bn) and almost my physical life after I paid the United Kingdom in good faith to protect and enforce my IP rights. This situation is so severe that you have breached every article of the Human Rights Act and have committed crimes against humanity.

9. Your Office has clearly become very nervous since the 6th June hearing because now I've found the evidence and your Office does not have any credible legal defence to crime you have committed against me and the people of the United Kingdom – stealing and defrauding our IP rights and investments. It's now time to pay up and compensate me or I will be issuing criminal charges against your Office and everyone involved.

I'm sure the general public reading this will be interested in your answer to my question in Point 6 above. I am still awaiting the transcripts from the 6th June hearing.

Sincerely,

Richard Perry
